Subject: Gallo Construction Co.: ACOP for Uncovered Roadsalt Pile - Anti-Clumping Agent Total and Free Cyanide Discharges

Attached FYI is an ACOP recently executed between MassDEP/SERO and Gallo Construction Co. relative to concentrations of Free Cyanide above acute and chronic NRWQC found in swales and a stream that received runoff from a road salt stockpile on the Gallo Property that was being constructed but not completely covered.

I am forwarding this ACOP to you in that I think it may be of interest to you, and I believe it is somewhat pertinent to the MassDOT I-

90/I-93/TWT tunnel drainage discharge situation with which we-all are involved (PACN being one of the COCs in the tunnel drainage). As far as Dave Ferris can recall, this is the first MassDEP Enforcement Case under section 314 CMR 3.03 of our Surface water Discharge Permit Regulations - "discharge of pollutants to surface water without a currently valid permit" that directly addresses Cyanide from road salt.

Please pay particular attention to Paragraphs 5.C., 5.G. and 8.A (which requires Gallo to submit a NPDES Multi-Sector Storm Water Discharge Permit to EPA).

All thoughts/comments gratefully accepted.

For Use In Intra-Agency Policy Deliberations

Looking at the 6/26/11 WEEKLY REPORT in the Compliance & Enforcement section I see italics item on next to last page there is a write-up about the ACOP that SERO negotiated with Gallo Construction Co. Inc. of Taunton relative to the unpermitted discharge of Free and Total Cyanide from an uncovered salt stockpile. Can I get an electronic copy of that ACOP?(*See attached file: 290720 GALLO CONSTRUCTION CO., INC-BRP-REACT-ACOP.pdf*)
